

Ai.sport - Complete System Architecture

This document contains the complete structural and behavioral diagrams of the Ai.sport platform. Any software engineer or stranger reviewing this will instantly understand the hardware, AI integrations, database structure, and user workflows.

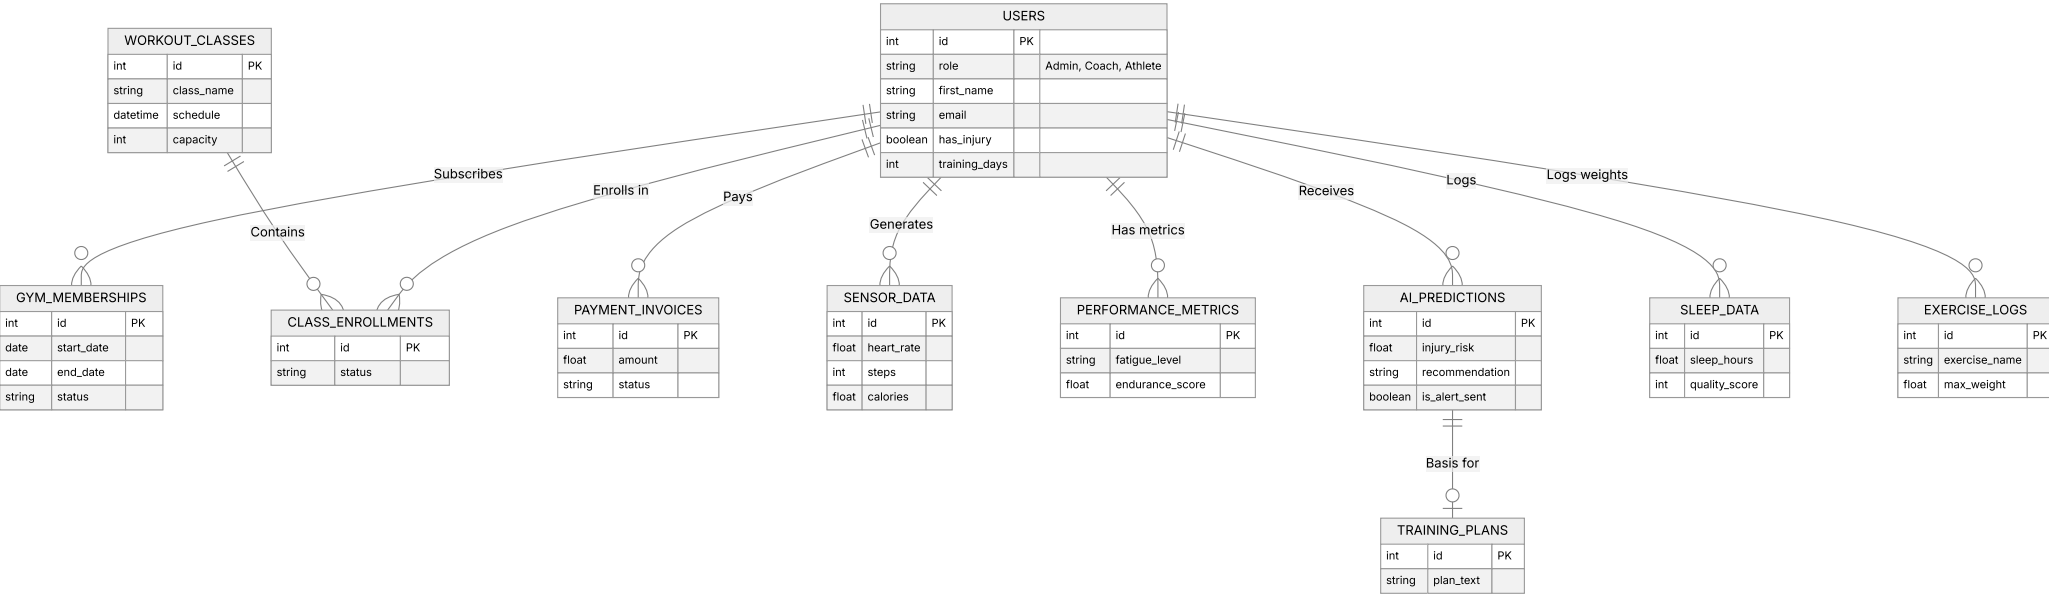

1. System Architecture (High-Level)

Shows how Hardware (IoT), Backend, AI Engine, and Frontend interfaces communicate.

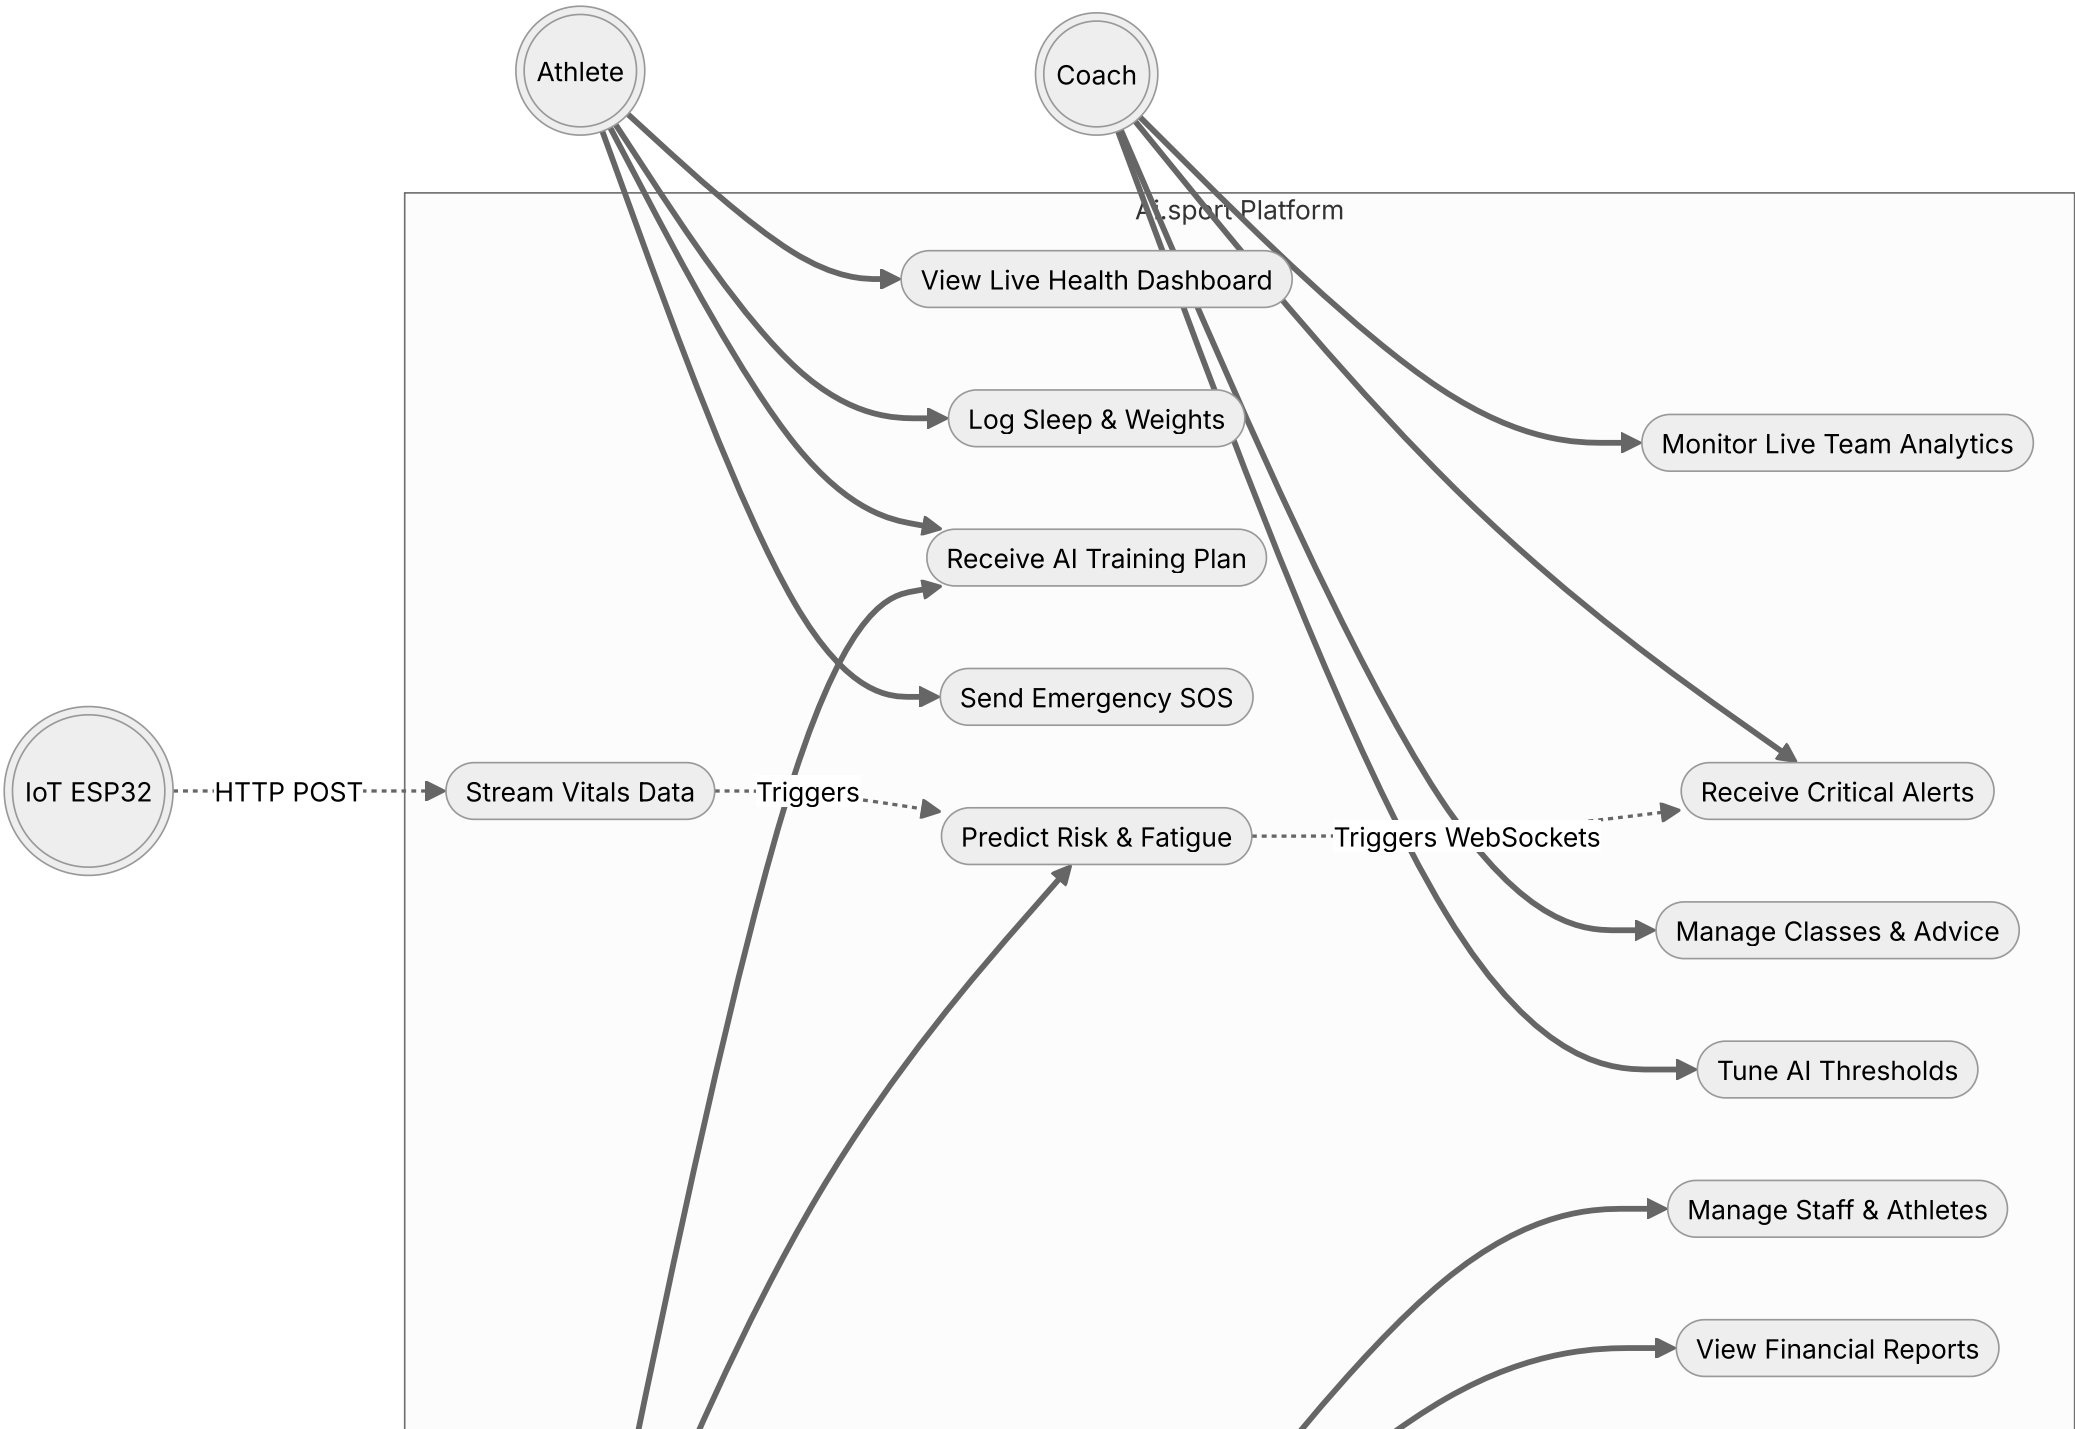

2. Comprehensive Entity-Relationship Diagram (ERD)

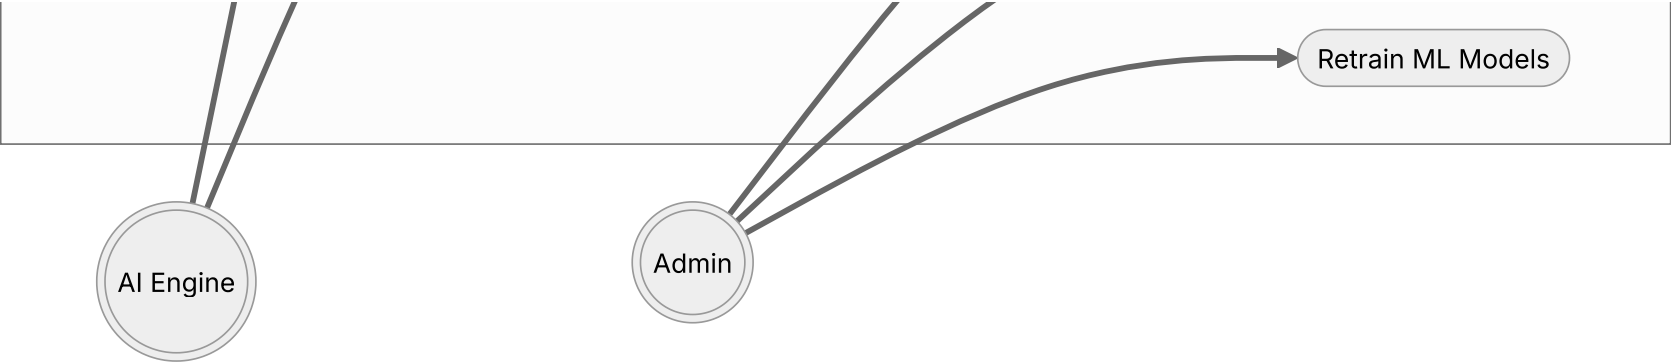

The complete database schema including all 14 entities and their relationships.

3. Complete Use Case Diagram

Illustrates all system actors (including IoT/AI) and every possible interaction they can perform.

4. Real-Time AI Alerting Flow (Sequence Diagram)

Demonstrates the project's core feature: the split-second journey of data from the hardware to the coach's screen when danger is detected.
